

Accessories - Mountings, Flanges Brackets & Misc

British Encoder Products Accessories :-

British Encoder Products Company offers a wide range of accessory items to help you complete your encoder application. In many instances, it's necessary to position a rotary encoder with a mounting bracket or Flange in order to obtain the desired feedback. BEPC offers mounting brackets for a number of Encoder models. All BEPC brackets are manufactured of durable materials and have the proper mounting holes and geometry for easy application to our encoders.

Below are charts showing a selection of our available fixing options, We also have a selection of options not shown here and can also offer modified versions to suit your individual needs to allow you to replace a competitors model with one of our own.

PIVOT BRACKET OPTIONS :-

FOR MOST LINEAR MEASUREMENT APPLICATIONS, our line of Tru-Trac® encoders is a great option. These integrated linear measurement solutions are easy to install and deliver reliable, accurate feedback for applications such as cut-to-length, spooling, length measurement, and print registration.

Occasionally, though, there is a linear measurement application that requires something our Tru-Trac® encoders don't offer. Maybe you need absolute feedback. Maybe you need an additional bearing load. Maybe you need the encoder to be programmable.

If your application calls for any of those options, we have another solution: a bracket that turns a Standard encoder into a linear measurement solution.
